

## Hardness Tester\_AS-120NT

### describe

Used to accurately measure and record the hardness of various materials (such as coatings, plastic, wood or metal surface hardness)

### characteristics

- \* The measured surface can be flat or curved.
- \* Not limited by area size.
- \* Easy to operate, stable performance.
- \* Easy to carry and other characteristics.

### parameter

Material of the spring	Spring steel
Material of the tester head	Tungsten carbide
Test head diameter	0.5mm (Opel, optional)
	0.75mm (Bosch, standard)
	1.0mm(optional) (in accordance with ISO1518 and DEF)
Spring pressure range	0~3N (blue mark)
	0~10N (red mark)
	0~20N (yellow mark)
	0~40N (white mark), (optional)
